Dears:

I am writing to submit my resume to be considered for the open position of Senior UI UX designer at your company.
With extensive experience in designing and implementing web-based user interfaces, I am well suited to this position.

For over 10 years I have been an experience in visual design and UI UX front-end at multi company, where I used Photoshop,Illustrator, HTML, CSS, jQuery and javascript to direct and design front-end projects from concept to completion.
I have experience managing web and interactive communication projects from initial consultation through successful launch and have a proven ability to handle various projects at the same time and complete them by given deadline.

SOME HIGHLIGHTS OF MY EXPERIENCE INCLUDE:

- Heavily involved in every step of application framework redesign, including design photoshop, Illustrator, specifications and redlining, creating interactive prototypes in Axure, CSS3 implementation, and usability testing, That means meshing your client's intent and the target audience. So whether we are talking librarians movie fans adults students or children sophistication or whimsy it has to be highly technical but comfortable on the back end.

- Collaborated with developers and designers using Subversion for version control

- Trained designers and developers on creating icon fonts and using them in Axure and Photoshop, then implementing them with HTML5 and CSS3

- Completed UI redesign of website using usability case studies, wireframes, and prototypes to create a fully functional web application

- Designed and developed interactive prototypes and mockups using HTML5, CSS3, and jQuery for future enhancements of the website, then implemented them on the live web platform

- Worked with the development team to correct any UI problems or HTML/CSS issues

- With my diverse and successful background in UI and UX design, I am uniquely suited to make a big difference to the digital face of your organization. Thank you in advance for your consideration, and I look forward to our conversation.

SINCERELY,
AHMED ALI MOAHMED
